

Troubleshooting Boxed Error File Uploads

After loading a file into the Data Lake you may see a status other than “SUCCESS”. Depending on the type of file you are trying to load you may see a failed status: If you hovered over the failed file icon, you should see the following:

Possible Causes

When the data lake engine attempted to process the file, the uploaded file did not match a single column with the previous schema.

Fix:

Make sure you have the right schema and/or dataset then try to load the file again. If this does work, try creating a new dataset to load the data into.
